

Simplify Management of IoT Printers with SOTI Connect

Simple, streamlined management of networked printers

The number of IoT printers throughout organizations is continuing to grow, creating a unique challenge for IT teams. Most lack the crucial visibility of all networked printers within their environment—and an efficient way to manage them. As a result, the amount of time, money and resources needed to deploy, manage and update printers grows. IT teams looking to regain control of networked printers need a system that efficiently automates printers' deployment, management and security, and provides total visibility of all deployed printers.

Simplify printer management with SOTI Connect, an IoT management solution built on a highly flexible, data-driven architecture. With SOTI Connect, IT teams are provided with comprehensive visibility into all company printers, enabling them to quickly discover, configure and deploy new network printers with ease. Lower total cost of ownership (TCO) with SOTI Connect's remote management capabilities, robust security features, centralized platform and more. Bolster operations and productivity across the enterprise with SOTI Connect.

Printer Management Through a Single Pane of Glass

SOTI Connect provides centralized control of all networked printers within an organization's technology infrastructure. Send updates, troubleshoot issues, upgrade security and more using various communication protocols—all from a centralized location.

Rapid Deployment

Enjoy rapid printer discovery, enrollment and deployment with SOTI Connect's data-driven architecture. Quickly introduce or provide printer support from the SOTI Connect printer console without writing a single line of code or

waiting for software updates. Enrolling and provisioning new printers takes just minutes, reducing the time and effort needed to set up and deploy new printers.

Simplify Management of Thermal Printers

SOTI Connect allows for fast, easy management of all printer types, including industrial, desktop and mobile. Monitor printer performance and status from remote locations for fast, simple management. And with support for popular IoT protocols like REST and MQTT, concern for whether or not new printers can be supported or managed is mitigated.

More Data For Better Analytics

SOTI Connect's data-driven architecture provides users with fast, easy access to printer data, including health, status, temperature, storage and more. Easily integrate gathered information with data analytics tools for further exploration and smarter decision-making.

Lower Operational Costs

Cut down on maintenance and resource costs with SOTI Connect's remote configuration actions. Easily monitor printer health and status to avoid costly downtime and quickly take remediation actions if pre-defined conditions are not met.

Compatible Zebra Printers

- ZT231
- ZT411
- ZT421
- ZT510
- ZT600 Series
- ZE511
- ZE521
- ZQ300 Series
- ZR300 Series
- ZQ511
- ZQ521
- ZQ600 Series
- ZR600 Series
- ZD510-HC
- ZD411 Series
- ZD421 Series
- ZD611 Series
- ZD621 Series

Simplify printer management. Reduce operational costs. Maximize printer uptime.
