This document summarizes the following driver releases and contains information on the release of the Zebra ZC100/300 Series Card Printer Mac Driver, Version 1.0.10.0

Driver	Release Date
Version 1.11.00	April 23, 2024

Supported Operating Systems

This release of the driver is intended for installation and use with the following operating systems:

- Monterey v.12.7.1
- Ventura v. 13.5.2

This software release is intended to be a common driver for installation and use with the following Zebra Card Printers and the associated firmware version, noted below:

Printer Models: ZC100/300 Series Card Printers

Minimum firmware version: V201.01.15

Driver Installation/Removal Procedures

Installation

1. Run the Zebra_ZC_Card_Printer_Mac_Driver-DZCG.1.0.10.0.pkg from download folder. This is the setup for ZC printer driver.
2. Choose among the Ethernet and USB printers. Based upon this, the printer drivers for the specific printers will be installed.
3. Choose the destination location or leave it to default value.
4. In case of Ethernet printer driver, a dialog will appear asking the IP address of the Ethernet printer. Enter the Ethernet printer IP address and click Ok. This will cause the Ethernet printer to be installed in the system.
5. In case of USB printer driver, a plug and play dialog with Continue Anyway and Stop Installation will be displayed if driver is not signed. Click Continue Anyway to continue the installation. In case of signed driver, the installation will happen automatically without any need for manual intervention.
6. After the installation is completed, Zebra ZC ZC100/ZC150/ZC300/ZC350 Network CardPrinter will be displayed as printer name in case of Ethernet printers, and Zebra ZC USB Card Printer will be displayed in case of USB printers in System Preference - > Printers & scanners.
7. Now the printer will be installed and ready to use.
8. Now run any application like MS-word and Image viewer try to perform printing. This should result in the preview of the front and back side images in print emulator screen if emulator is used as printer. Otherwise, the document should be printed in the real printer.

Uninstallation

1. Go to Application folder and open the Zebra ZC Driver Uninstall application to initiate the uninstallation process.
2. Now uninstallation will complete. It may ask for system password to make the changes
3. A warning message will appear. Click Ok to confirm uninstallation.
4. Uninstallation will be completed.

Enhancements and Issues Corrected in Version Version1.0.10.0

- Support both Monterey V12,7.1 and Ventura V.13.5.2 operating systems.
