## Introduction

Imager Control Services (ICS) is a stand-alone Windows Control Panel application that is used for imagers and cameras, in legacy Psion products. ICS is required for some imager engines (SE4600 excluded). It includes all camera and imaging management parameters as well as the barcode options and features found in SCS (scanner Service for laser scanners).

## Description

This release contains all changes in ICS 19.0 and adds support for Omnii devices (XT15) with -600 MLBs.

## Contents
